this talk is about:

what is Fedora?

who is Fedora?

why does Fedora matter?

how do you join the open source movement?

what is Fedora?

Update	Comment	From	Karma
iproute-2.6.25-1.fc9	It did in fact fix bug 444520 for me. I did see some odd things with connection tracking until I restarted iptables which reloaded a connection tracking module. So if you install this you may need to do that if you don't re boot. Since I restarted iptables everything seems to be fine.	bruno
